The
RIDGEPRO[®]

THE PREMIUM DEVICE FOR STEEP-SLOPE ROOFING SAFETY!

**Stay Safe
Work Smart**

The RIDGEPRO[®] Adjustable Roof Anchor System

The RIDGEPRO[®] is applicable to many industries where workers must ascend and descend steep-slope roofs. We are dedicated to dramatically reduce the number of falls and fatalities associated with roofing.

- Constructed from solid, aircraft-grade aluminum
- Manufactured in the USA
- Etched pitch grid allows easy and accurate 6/12 to 12/12 pitch selection
- Engineered arch straddles the peak
- Integrated rope/harness connection ring
- Four pre-drilled holes for anchoring with 5/16" lag screws

The RIDGEPRO[®] exceeds the industry standard of 5,000 pound tensile strength when anchored and allows workers to connect to the peak BEFORE stepping off the ladder.

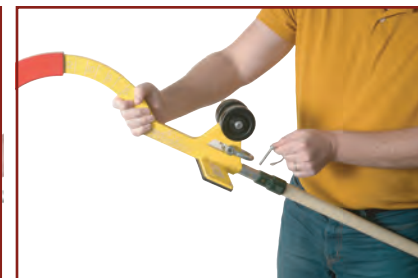

Quick and Easy to Assemble

1. After checking the roof pitch, match the pitch to the etched number and lock it in place.

2. Clip your lifeline to the shackle.

3. Attach the extension pole and lock it in with a pin.

Take advantage of the built-in coupler on the RIDGEPRO[™] that receives this RidgePro Extension Pole - a locking extension pole (not nylon-threaded) which can extend from 8' - 16' to easily reach the roof peak!

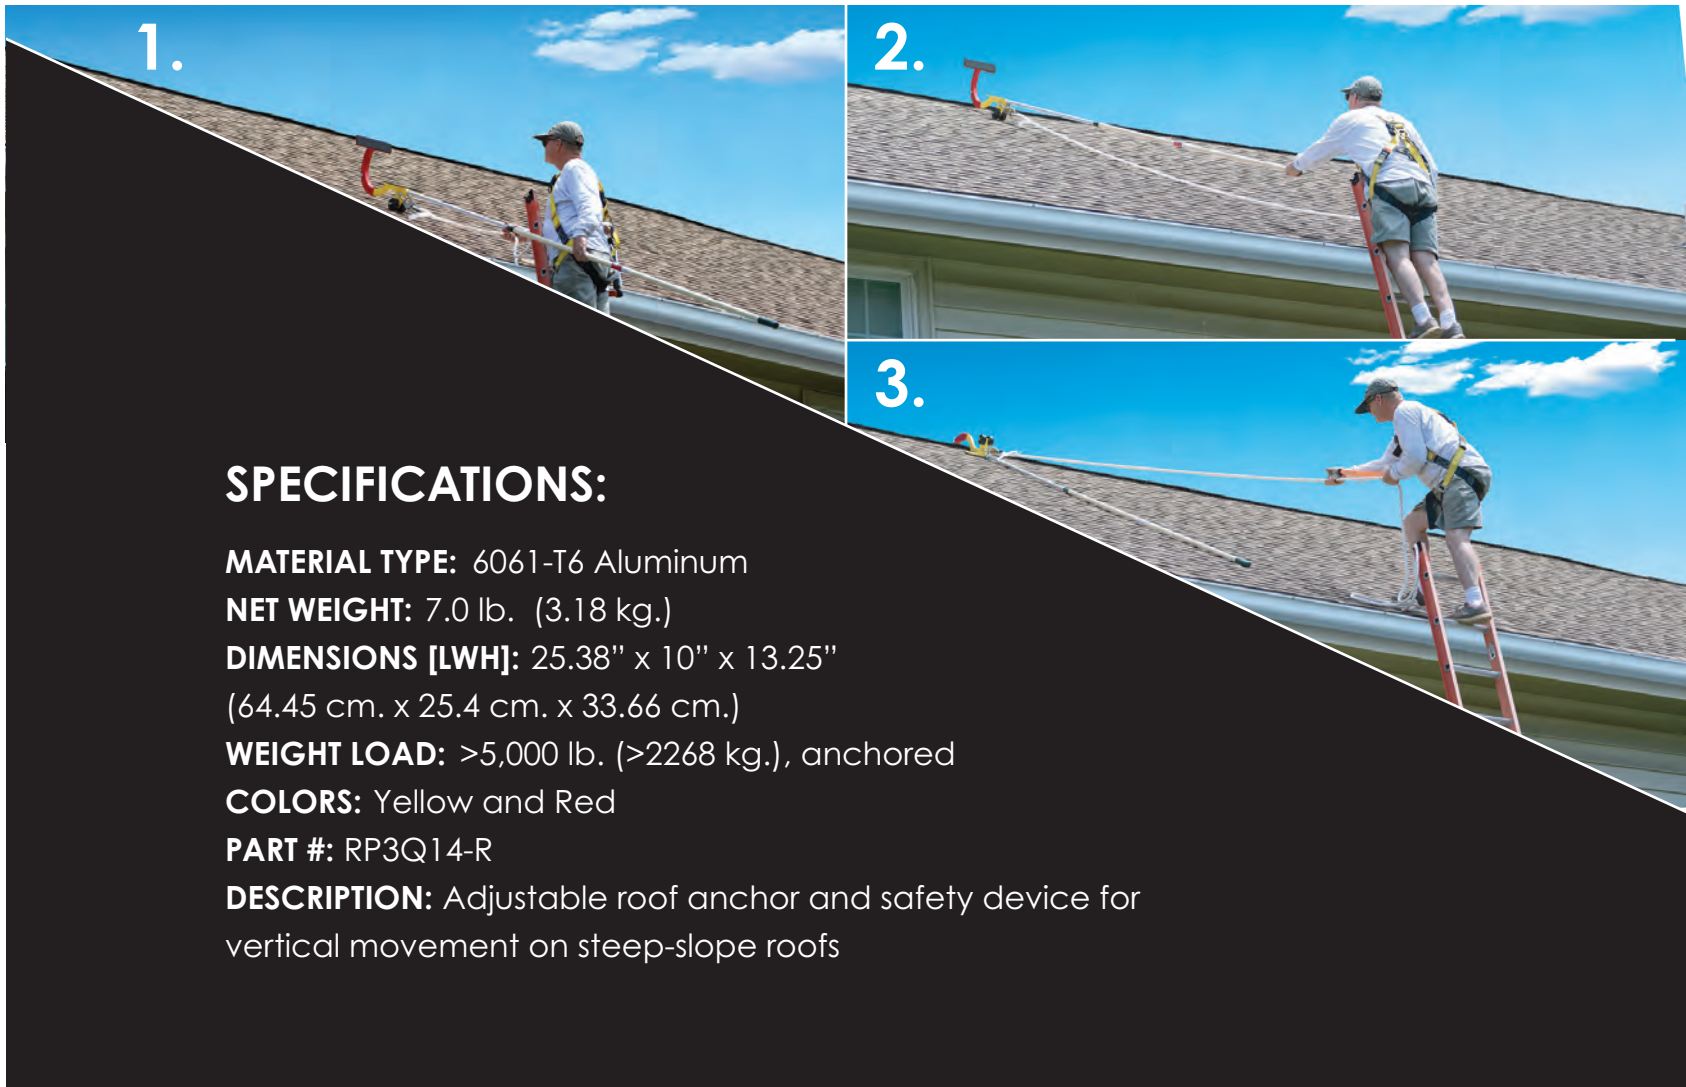

Cross-Industry Versatility

Workers in many fields benefit from the extra safety provided by **The RIDGEPRO®**. The product is already in use by roofers, solar panel installers, pest control technicians, chimney repair contractors insurance claims adjusters, and holiday light designers/ installers

Description	SKU	Wholesale Price
The RidgePro	109100	\$523.59
RidgePro Extension	109101	\$68.47

The RIDGEPRO® in Action

SPECIFICATIONS:

MATERIAL TYPE: 6061-T6 Aluminum

NET WEIGHT: 7.0 lb. (3.18 kg.)

DIMENSIONS [LWH]: 25.38" x 10" x 13.25"
(64.45 cm. x 25.4 cm. x 33.66 cm.)

WEIGHT LOAD: >5,000 lb. (>2268 kg.), anchored

COLORS: Yellow and Red

PART #: RP3Q14-R

DESCRIPTION: Adjustable roof anchor and safety device for vertical movement on steep-slope roofs
